

Pratik Pingale

FULL-STACK DEVELOPER · CLOUD-FOCUSED ENGINEER

Pune, India

📞 (+91) 9075715518 | ✉️ pratikpingale@gmail.com | 🏠 proxzima.dev | 🐙 github/proxzima | 🌐 in/pratik-pingale

"I believe I can and I'm halfway there."

Summary

Full-Stack and cloud-focused software engineer with experience in AI-driven solutions, designing and deploying secure, scalable services on Kubernetes and Azure. Skilled in CI/CD, monitoring, and integrating AI/ML capabilities with a strong track record of improving reliability, ensuring compliance, and delivering enterprise-grade solutions in agile environments through secure architecture and efficient cloud practices.

Skills

Programming Languages: C#, TypeScript, Python, SQL, C/C++, Kotlin. **Frameworks:** ASP.NET Core, React, Angular, gRPC, Django
Cloud & DevOps: Microsoft Azure & DevOps, AWS, Google Cloud, Kubernetes, Docker, Helm, CI/CD, PostgreSQL, Redis, RabbitMQ, NATS
Practices & Tools: OOPS, REST API Design, Unit & Integration Testing, Code Reviews, SDLA Compliance, SAgile, Threat Modeling, Git

Professional Experience

Emerson

Pune, India

SOFTWARE DEVELOPMENT ENGINEER

Feb 2023 - Current

- Led the internal rollout of **AI-assisted** development tools (**GitHub Copilot**) across the engineering team, accelerating feature delivery by reducing average code-review cycle time by **~25% (48h to 36h)** and increasing merged-PR throughput by **~30%**.
- Contributed to the MVP release of cloud migration replacing a legacy on-prem tool, supporting roadmap targets of 1,000+ global sites and a major revenue stream, by driving feature implementation and cross-team coordination.
- Re-architected data workflows into **gRPC** microservices with On-Prem data caching and async workers, cutting data fetching latency by **~93% (5000ms to 350ms)** and reducing database read-load by **~60%**, improving end user reliability.
- Optimized Kubernetes deployments through resource tuning, Horizontal Pod Autoscaling (HPA), and Prometheus monitoring, lowering CPU usage per pod by **48%**, increasing throughput by **2.5x (up to 15000 requests/sec)**, and reducing cloud infra spend by **~32%**.
- Improved system reliability by raising unit and integration test coverage from **38% to 54%** and enforcing CI/CD automated smoke tests, resulting in a **62%** reduction in monthly SEV incidents (**13 to 5**).
- Strengthened secure-design & delivery practices by authoring threat models, SDLA-compliant design docs and security checklists that ensured **zero critical security findings** across multiple releases, enabling predictable PI delivery without sprint spillovers.

Convin.ai

Pune, India

BACKEND ENGINEER AND ANDROID DEVELOPER

Sept 2021 - Apr 2022

- Redesigned ingestion pipelines using Django REST, asynchronous workers, and PostgreSQL indexing, increasing throughput to **~1,500** calls/day and reducing end-to-end latency by **~40%**.
- Automated language detection for **98%** of calls by integrating Amazon Transcribe with custom NLP heuristics, improving transcript quality to **~85%** and reducing manual corrections by **~60%**.
- Developed a production-ready enterprise Android application featuring secure call recording and resumable background synchronization.
- Achieved successful recording uploads within 5 minutes for **~90%** of sessions, reducing manual audio transfer requirements by **~75%**.
- Collaborated with a 13-person team on CI/CD pipelines, client onboarding and feature prioritization, delivering a centralized call-review integration for a 30-person management team. (Letter of Recommendation) 📄.

Organizational Experience

AISSMS COE

Pune, India

CORE TEAM MEMBER MICROSOFT STUDENT CLUB

July 2021 - Sept 2022

- Built a university Timetable Scheduler 📅 model with a colleague, which uses a genetic algorithm and is portable for various scheduling scenarios, such as school timetables or employee timesheets.
- Designed the scheduler to be flexible for any case, with lower time complexity compared to existing models that were only useful in specific scenarios.
- Developed a Certificate App 📄 for easier certificate generation and distribution, which helped the college's Sports Department manage certificates for competitions and events.
- Technical Skills:** Python with genetic algorithms, Django, HTML5, CSS3, JavaScript, CI & CD, Git.
- Soft Skills:** Teamwork, time management, communication, logical thinking.

AISSMS COE

Pune, India

CORE TEAM MEMBER GOOGLE DEVELOPER STUDENT CLUB

Sept 2020 - Sept 2022

- Led the Competitive Programming Team and organized multiple virtual and in-person events for freshmen and juniors.
- Conducted events focused on Git, Data Structures, Algorithms, and Competitive Programming, helping participants understand fundamental concepts and improve their coding skills.
- Contributed as a member of the Web Development Team to the DSC AISSMSCOE official website.
- **Technical Skills:** Python (Algorithms, Data Structures), Tailwind CSS, Firebase, Git.
- **Soft Skills:** Leadership, Time Management, Communication, Logical Thinking.

Projects

Dependency Analysis Reporting Tool

Mar 2026 - Current

- Built an **AI-assisted** dependency analysis platform using **GitHub Copilot** to automate open-source compliance checks across enterprise repositories and standardize policy validation workflows.
- Integrated **Black Duck** and **Azure DevOps APIs** to continuously ingest repository metadata, detect vulnerable/outdated libraries, and generate actionable remediation suggestions for engineering teams.
- Implemented rule-based package recommendation and reporting pipelines with exportable dashboards, enabling faster audit readiness and more consistent SDLA-aligned dependency governance.

ADO Code Review

Oct 2025 - Current

- Developed an **AI-powered** Azure DevOps PR review assistant that analyzes pull-request diffs and generates contextual inline comments using **GitHub Copilot**.
- Designed support for multi-language repositories with reusable review prompts and policy checks, helping teams enforce code quality, security, and maintainability standards consistently.
- Automated review summarization and feedback publishing in CI workflows, reducing manual reviewer effort and shortening developer feedback loops in day-to-day delivery.

Display Forge

Feb 2024 - June 2025

- Engineered an **AI-powered** industrial HMI generation platform using **Azure OpenAI GPT-4o** to convert customer input into structured, ISA-101 aligned screen definitions for DeltaV Live workflows.
- Built transformation pipelines that produce DeltaV Live-importable graphics artifacts, with validation checks for naming standards, object consistency, and template conformance.
- Introduced mandatory human-in-the-loop approval gates and traceable review checkpoints for safety-critical deployments, balancing automation speed with operational reliability and control.

DarkSpider

Pune, India

AISSMS COE

Aug 2022 - Feb 2023

- White paper: Anatomy of the Dark Web's Network Structure to Detect Illicit websites
- Engineered a multithreaded crawler to map dark-net site structures as a directed graph, utilizing PageRank algorithms to identify high-value nodes.
- Developed incremental crawling with content-based ranking and change detection mechanisms with URL expiration handling to maintain dataset freshness and eliminate redundant fetches.
- Implemented rate limiting and sandboxed execution environments to ensure ethical research practices and minimize operational impact during data collection.

Education

AISSMS College of Engineering

Pune, India

BACHELOR OF TECHNOLOGY IN COMPUTER ENGINEERING

Aug 2019 - Current

- Graduated with *Honours* in *Data Science and Machine Learning*. 9.38 CGPA
- **Relevant Coursework:** AI, ML, Deep Learning, NLP, Blockchain, Security, DBMS, Data Structures, Computer Graphics, Discrete Math, Big Data Analytics, Data Visualization, Statistics

Achievements

2025	Certificate	Microsoft Certified: Azure Fundamentals (AZ-900)	Pune, India
2024-26	Certificate	Recognition for Outstanding Contribution	Pune, India
2024	Winner	Emerson 2024: Capture The Flag (Hack The Box)	Global
2022	White paper	Anatomy of the Dark Web's Network Structure to Detect Illicit websites	India
2020	Winner	Internal Hackathon for Smart India Hackathon (SIH)	India
2015	Winner	District level Karate Competition	Pune, India

Interests

Linux	Since 2020, I have loved using Linux. Linux ricing is my hobby.
Karate	I started karate at age 15 and have participated in several state and national-level competitions.
Music	I enjoy almost all types of music, but my favorite genres are aesthetic EDM and electro.
