Summary

DevOps and Software Engineer with 4+ years of experience bridging development and operations across the full software development lifecycle, specializing in CI/CD automation, cloud infra management, and release engineering on Azure and AWS. Hands-on with C#, C++, PowerShell, and Python for automation tooling; experienced with Azure DevOps (ADO), Docker, Kubernetes, and Grafana/Prometheus monitoring across Windows (Win32, x64) and Linux environments. Consistently delivers secure, scalable systems through Agile cross-functional collaboration.

Skills

Cloud & DevOps Microsoft Azure & DevOps (ADO), AWS, GCP, PowerShell, Azure CLI, Docker, Kubernetes (K3S), Helm, CI/CD, Linux, Grafana, Prometheus, PostgreSQL, SQL Server, Redis, RabbitMQ, NATS

Development Languages: C#, TypeScript, Python, SQL, C/C++ (Win32, x64), Kotlin | **Frameworks:** .NET/.NET Core, React, Angular (RxJS), EF Core, LINQ, Next.js, gRPC, WPF, Django | **AI Tools & Platforms:** Azure OpenAI, Microsoft AI Foundry, GitHub Copilot

System & Concepts OOP, REST API Design, Asynchronous Programming, Unit & Integration Testing, Configuration Management, SDLC, Code Reviews, Database Design & Optimization, SAFe Agile/Scrum, Git

Professional Experience

Emerson

Pune, India

SOFTWARE DEVELOPMENT ENGINEER 1

Jun 2023 - Current

- Set up and optimized **Kubernetes (K3S on Linux)** infrastructure through resource tuning, and **Grafana/Prometheus** monitoring, lowering CPU usage per pod by **48%**, increasing throughput by **2.5x (up to 15,000 req/sec)**, and reducing cloud infra spend by **~32%**.
- Strengthened secure-design & delivery practices by authoring threat models, SDLA-compliant design docs and security checklists that ensured **zero critical security findings** across multiple releases, enabling predictable PI delivery without sprint spillovers.
- Led the internal rollout of **AI-assisted** automation tooling (**GitHub Copilot**) across the engineering team, reducing average code-review cycle time by **~25% (48h to 36h)** and increasing merged-PR throughput by **~30%**.
- Re-architected data workflows into **gRPC** microservices with on-prem data caching and async workers, cutting data fetching latency by **~93% (5000ms to 350ms)** and reducing database read-load by **~60%**, improving end user reliability.
- Contributed to the MVP release of cloud migration replacing a legacy on-prem tool, supporting roadmap targets of **1,000+ global sites** and a major revenue stream, by driving feature implementation and cross-team coordination.
- Built an **AI-powered** industrial HMI generation platform in **Angular & .NET** using **Azure OpenAI GPT-4o** that automatically transforms customer inputs into ISA-101 compliant, DeltaV Live importable graphics with mandatory human-review gates for safety-critical systems.

ASSOCIATE SOFTWARE ENGINEER

Feb 2023 - Jun 2023

- Improved system reliability by raising unit and integration test coverage from **38% to 54%** and enforcing CI/CD automated smoke tests, resulting in a **62%** reduction in monthly SEV incidents (**13 to 5**).
- Architected and delivered an end-to-end **Next.js** PDF generation service using the **Chromium** API, rendering complex inter-hyperlinked documents up to **1,000+ pages** as digitally signed, tamper-proof PDFs, eliminating manual export workflows for enterprise customers.
- Awarded Recognition for Outstanding Contribution (2024-26) 🏆

Convin

Pune, India

BACKEND ENGINEER AND ANDROID DEVELOPER

Sept 2021 - Apr 2022

- Redesigned ingestion pipelines using Django REST, asynchronous workers, and PostgreSQL indexing, increasing throughput to **~1,500** calls/day and reducing end-to-end latency by **~40%**.
- Automated language detection for **98%** of calls by integrating Amazon Transcribe with custom NLP heuristics, improving transcript quality to **~85%** and reducing manual corrections by **~60%**.
- Developed a production-ready enterprise Android application featuring secure call recording and resumable background synchronization.
- Achieved successful recording uploads within 5 minutes for **~90%** of sessions, reducing manual audio transfer requirements by **~75%**.
- Collaborated with a 13-person team on CI/CD pipelines, client onboarding and feature prioritization, delivering a centralized call-review integration for a 30-person management team. (Letter of Recommendation) 🏆

Projects

Dependency Analysis Reporting Tool 🏆

Mar 2026 - Current

- An **AI-assisted (MCP)** dependency analysis platform using **GitHub Copilot** to automate Open Source compliance validation across enterprise repositories, integrating **Black Duck** and **Azure DevOps APIs** for vulnerability scanning, and intelligent package recommendations.

Azure DevOps Code Review 🏆

Oct 2025 - Apr 2026

- An **AI-powered** Azure DevOps PR code review automation using **GitHub Copilot** to generate intelligent inline comments with multi-language support, improving review efficiency and code quality.

Education

AISSMS College of Engineering

Pune, India

BACHELOR OF TECHNOLOGY IN COMPUTER ENGINEERING

Aug 2019 - Aug 2023

- Graduated with *Honours* in *Data Science and Machine Learning*.

9.38 CGPA

Achievements

2025 **Certificate** Microsoft Certified: Azure Fundamentals (AZ-900) 🏆

Pune, India
