Summary

Full-stack software engineer with strong backend focus in C# and ASP.NET Core, delivering scalable services, REST and gRPC APIs, and cloud-native microservices for enterprise applications. Experienced in legacy-to-cloud modernization, Kubernetes-based deployments, CI/CD automation, and production quality improvements, with additional AWS hands-on exposure through service integrations and data-processing workflows.

Skills

Programming Languages: C#, TypeScript, Python, C/C++. **Frameworks:** .NET, Angular, Django, gRPC, REST APIs, Microservices
Cloud & DevOps: Microsoft Azure, AWS, Azure DevOps, Kubernetes, Docker, Helm, CI/CD Pipelines, PostgreSQL, Redis, RabbitMQ, NATS
Practices & Tools: Unit & Integration Testing, Threat Modeling, SDLA Compliance, Code Reviews, Observability & Monitoring, SAFe Agile

Professional Experience

Emerson

Pune, India

SOFTWARE DEVELOPMENT ENGINEER (FULL-STACK & CLOUD)

Feb 2023 - Current

- Built and enhanced backend services using **C#** and **ASP.NET Core** patterns for enterprise cloud products, collaborating across product, QA, and platform teams to deliver secure and scalable releases.
- Led the internal rollout of **AI-assisted** development tools (**GitHub Copilot**) across engineering squads, reducing average code-review cycle time by **~25% (48h to 36h)** and increasing merged-PR throughput by **~30%**.
- Contributed to an MVP cloud modernization initiative replacing a legacy on-premises tool with cloud-native services, supporting roadmap targets for 1,000+ global sites.
- Re-architected backend data workflows into **gRPC microservices** with asynchronous workers and caching, reducing fetch latency by **~93% (5000ms to 350ms)** and lowering database read load by **~60%**.
- Delivered API integrations across service boundaries using **REST** and gRPC communication models to improve reliability and interoperability of distributed components.
- Optimized Kubernetes deployments using resource tuning, Horizontal Pod Autoscaling (HPA), and Prometheus-based monitoring, lowering CPU usage per pod by **48%**, increasing throughput by **2.5x (up to 500 requests/sec)**, and reducing cloud spend by **~32%**.
- Improved release reliability by raising unit and integration test coverage from **38% to 54%** and enforcing **CI/CD** automated smoke tests, resulting in a **62%** reduction in monthly SEV incidents (**13 to 5**).
- Strengthened secure engineering practices by authoring threat models, SDLA-compliant design docs, and release security checklists that drove **zero critical security findings** across multiple releases.

BACKEND ENGINEER AND ANDROID DEVELOPER

Sept 2021 - Apr 2022

- Developed and enhanced backend services using **Django REST APIs**, asynchronous workers, and PostgreSQL indexing, increasing throughput to **~1,500 calls/day** and reducing end-to-end latency by **~40%**.
- Automated language detection for **98%** of calls by integrating Amazon Transcribe with custom NLP heuristics, improving transcript quality to **~85%** and reducing manual corrections by **~60%**.
- Developed a production-ready enterprise Android application featuring secure call recording and resumable background synchronization.
- Achieved successful recording uploads within 5 minutes for **~90%** of sessions, reducing manual audio transfer requirements by **~75%**.
- Collaborated with a 13-person team on **CI/CD pipelines**, debugging, client onboarding, and feature prioritization, delivering a centralized call-review integration for a 30-person management team. (Letter of Recommendation) 📄.

Projects

Dependency Analysis Reporting Tool 📄

Mar 2026 - Current

- An **AI-assisted** dependency analysis platform using **GitHub Copilot** to automate Open Source compliance validation across enterprise repositories, integrating **Black Duck** and **Azure DevOps APIs** for vulnerability scanning, and intelligent package recommendations.

ADO Code Review 📄

Oct 2025 - Current

- An **AI-powered** Azure DevOps PR code review automation using **GitHub Copilot** to generate intelligent inline comments with multi-language support, improving review efficiency and code quality.

Education

AISSMS College of Engineering

Pune, India

BACHELOR OF TECHNOLOGY IN COMPUTER ENGINEERING

Aug 2019 - Aug 2023

- Graduated with *Honours* in *Data Science and Machine Learning*.

9.38 CGPA

Achievements

2025 **Certificate** Microsoft Certified: Azure Fundamentals (AZ-900) 📄

Pune, India
