Summary

Full-stack software engineer with strong C#/ASP.NET Core and cloud experience, building secure, scalable, API-driven platforms on Azure and Kubernetes. Proven in hands-on feature delivery, microservice architecture, and CI/CD automation with measurable impact on latency, reliability, and cost. Brings a security-first mindset (threat modeling, SDLA-aligned), and practical GenAI adoption to improve engineering efficiency.

Skills

Programming Languages: C#, TypeScript, Python, SQL, C/C++, Kotlin. **Frameworks:** ASP.NET Core/WebAPI, React, Angular, gRPC, Django
Cloud & DevOps Microsoft Azure & DevOps, AWS, Google Cloud, Kubernetes, Docker, Helm, CI/CD, Linux, PostgreSQL, Redis, RabbitMQ, NATS
Practices & Tools OOP, REST API Design, Unit & Integration Testing, Code Reviews, SDLA Compliance, Threat Modeling, Agile/SCRUM, JIRA, OWASP-aligned secure coding, Git

Professional Experience

Emerson

Pune, India

SOFTWARE DEVELOPMENT ENGINEER

Feb 2023 - Current

- Led the internal rollout of **AI-assisted** engineering workflows (**GitHub Copilot**) across the team, reducing average code-review cycle time by **~25% (48h to 36h)** and increasing merged-PR throughput by **~30%**.
- Contributed to the MVP release of a cloud platform migration replacing a legacy on-prem tool by implementing production features in C# services and coordinating cross-functionally to support roadmap targets across 1,000+ global sites.
- Re-architected data workflows into **gRPC** microservices with on-prem caching and async workers, cutting data-fetch latency by **~93% (5000ms to 350ms)** and reducing database read-load by **~60%**.
- Optimized Kubernetes deployments through resource tuning, Horizontal Pod Autoscaling (HPA), and Prometheus monitoring, lowering CPU usage per pod by **48%**, increasing throughput by **2.5x (up to 15000 requests/sec)**, and reducing cloud infra spend by **~32%**.
- Improved platform reliability by raising unit and integration test coverage from **38% to 54%** and enforcing CI/CD automated smoke tests, resulting in a **62%** reduction in monthly SEV incidents (**13 to 5**) and faster defect resolution with operations partners.
- Strengthened secure design and delivery by authoring threat models, SDLA-compliant design docs, and security checklists, resulting in **zero critical security findings** across multiple releases.

Convin.ai

Pune, India

BACKEND ENGINEER AND ANDROID DEVELOPER

Sept 2021 - Apr 2022

- Redesigned ingestion pipelines using Django REST APIs, asynchronous workers, and PostgreSQL indexing, increasing throughput to **~1,500** calls/day and reducing end-to-end latency by **~40%**.
- Automated language detection for **98%** of calls by integrating Amazon Transcribe with custom NLP heuristics, improving transcript quality to **~85%** and reducing manual corrections by **~60%**.
- Developed a production-ready enterprise Android application featuring secure call recording and resumable background synchronization.
- Achieved successful recording uploads within 5 minutes for **~90%** of sessions, reducing manual audio transfer requirements by **~75%**.
- Collaborated in an agile 13-person team on CI/CD pipelines, client onboarding, and feature prioritization, delivering a centralized call-review integration for a 30-person management team. (Letter of Recommendation) 📄.

Projects

Dependency Analysis Reporting Tool 📄

Mar 2026 - Current

- An **AI-assisted** dependency analysis platform using **GitHub Copilot** to automate open-source compliance validation across enterprise repositories, integrating **Black Duck** and **Azure DevOps APIs** for vulnerability scanning, and secure package recommendations.

ADO Code Review 📄

Oct 2025 - Current

- An **AI-powered** Azure DevOps PR review automation using **GitHub Copilot** to generate intelligent inline comments with multi-language support, improving review efficiency, consistency, and secure coding quality.

Display Forge

Feb 2024 - June 2025

- An **AI-powered** industrial HMI generation platform using **Azure OpenAI GPT-4o** that automatically transforms customer inputs into ISA-101 compliant, DeltaV Live importable graphics with mandatory human-review gates for safety-critical systems.

Education

AISSMS College of Engineering

Pune, India

BACHELOR OF TECHNOLOGY IN COMPUTER ENGINEERING

Aug 2019 - Aug 2023

- Graduated with *Honours in Data Science and Machine Learning*.

9.38 CGPA

Achievements

2025 **Certificate** Microsoft Certified: Azure Fundamentals (AZ-900) 📄

Pune, India

2022 **White paper** Anatomy of the Dark Web's Network Structure to Detect Illicit websites 📄

India
