Summary

Full-Stack developer with 4+ years of professional experience designing, developing, and maintaining enterprise web applications. Proficient in **React** and **TypeScript** for responsive front-end development, RESTful API design and delivery with scalable back-end services, and cloud-native deployments on **Microsoft Azure**. Hands-on experience in CI/CD automation, microservices architecture, Azure DevOps, and production monitoring — with a consistent track record of delivering secure, reliable solutions across cross-functional Agile teams.

Skills

Front-End **React JS**, TypeScript / JavaScript, HTML5, CSS3, State Management (Context API / Redux), Angular (RxJS), Next.js

Back-End Node.js, .NET / .NET Core (C#), REST API Design & Development, Authentication & Authorization (OAuth 2.0, JWT), gRPC, EF Core, Django

Diagnostics Production Debugging, Root Cause Analysis (RCA), Log & Trace Analysis, Performance Profiling, Grafana, Prometheus

Cloud & Database **Azure** (App Service, SQL Database, Key Vault, Storage, Monitor, Application Insights, Entra ID, OpenAI, DevOps), PostgreSQL, SQL Performance Tuning, Redis

DevOps & Concepts GitHub Actions, CI/CD Pipelines, Docker, Kubernetes, Helm, Infrastructure as Code, Unit & Integration Testing, SAFe Agile / Scrum, Git

Professional Experience

Emerson

Pune, India

SOFTWARE DEVELOPMENT ENGINEER 1

Jun 2023 - Current

- Led the internal rollout of **AI-assisted** development tools (**GitHub Copilot**) across the engineering team, accelerating feature delivery by reducing average code-review cycle time by **~25% (48h to 36h)** and increasing merged-PR throughput by **~30%**.
- Contributed to the MVP release of an **Azure** cloud migration modernizing a legacy on-prem tool, enabling a roadmap supporting **1,000+ global sites** and a major revenue stream, through feature implementation and cross-team coordination.
- Built an **AI-powered** industrial HMI generation platform in **React & .NET** using **Azure OpenAI GPT-4o** that automatically transforms customer inputs into ISA-101 compliant, DeltaV Live importable graphics with mandatory human-review gates for safety-critical systems.
- Re-architected data workflows into **gRPC** microservices with on-prem data caching and async workers, cutting data fetching latency by **~93% (5000ms to 350ms)** and reducing database read-load by **~60%**, improving end user reliability.
- Optimized Kubernetes deployments through resource tuning, Horizontal Pod Autoscaling (HPA), and Grafana/Prometheus monitoring, lowering CPU usage per pod by **48%**, increasing throughput by **2.5x (up to 15000 requests/sec)**, and reducing cloud infra spend by **~32%**.
- Strengthened secure-design & delivery practices by authoring threat models, SDLA-compliant design docs and security checklists that ensured **zero critical security findings** across multiple releases, enabling predictable PI delivery without sprint spillovers.

ASSOCIATE SOFTWARE ENGINEER

Feb 2023 - Jun 2023

- Architected and delivered an end-to-end **Next.js** PDF generation service using the **Chromium** API, rendering complex inter-hyperlinked documents up to **1,000+ pages** as digitally signed, tamper-proof PDFs, eliminating manual export workflows for enterprise customers.
- Improved system reliability by raising unit and integration test coverage from **38% to 54%** and enforcing CI/CD automated smoke tests, resulting in a **62%** reduction in monthly SEV incidents (**13 to 5**).
- Awarded Recognition for Outstanding Contribution (2024-26) 🏆

Convin

Pune, India

BACKEND ENGINEER AND ANDROID DEVELOPER

Sept 2021 - Apr 2022

- Redesigned ingestion pipelines using Django REST, asynchronous workers, and PostgreSQL indexing, increasing throughput to **~1,500** calls/day and reducing end-to-end latency by **~40%**.
- Automated language detection for **98%** of calls by integrating Amazon Transcribe with custom NLP heuristics, improving transcript quality to **~85%** and reducing manual corrections by **~60%**.
- Developed a production-ready enterprise Android application featuring secure call recording and resumable background synchronization.
- Achieved successful recording uploads within 5 minutes for **~90%** of sessions, reducing manual audio transfer requirements by **~75%**.
- Collaborated with a 13-person team on CI/CD pipelines, client onboarding and feature prioritization, delivering a centralized call-review integration for a 30-person management team. (Letter of Recommendation) 📄

Projects

Dependency Analysis Reporting Tool 📄

Mar 2026 - Current

- An **AI-assisted (MCP)** dependency analysis platform using **GitHub Copilot** to automate Open Source compliance validation across enterprise repositories, integrating **Black Duck** and **Azure DevOps APIs** for vulnerability scanning, and intelligent package recommendations.

Azure DevOps Code Review 📄

Oct 2025 - Apr 2026

- An **AI-powered** Azure DevOps PR code review automation using **GitHub Copilot** to generate intelligent inline comments with multi-language support, improving review efficiency and code quality.

Education

AISSMS College of Engineering

Pune, India

BACHELOR OF TECHNOLOGY IN COMPUTER ENGINEERING

Aug 2019 - Aug 2023

- Graduated with *Honours* in *Data Science and Machine Learning*.

9.38 CGPA
