Summary

Backend .NET developer with 4+ years of professional experience in C#, ASP.NET Core, and enterprise systems engineering, with a strong focus on production debugging, root cause analysis, and system stability improvements. Proven track record of diagnosing complex production failures through log analysis and systematic investigation, resolving SEV incidents, and driving measurable performance optimizations. Experienced with monitoring tools (Grafana, Prometheus), microservices, CI/CD pipelines, and Agile delivery in cloud environments.

Skills

Development Languages: C#, SQL, TypeScript, Python, Golang, C/C++ | **Frameworks:** .NET/.NET Core, ASP.NET Core, EF Core, gRPC, WPF, Django, Angular (RxJS) | **AI Tools:** GitHub Copilot, Azure OpenAI

Diagnostics Production Debugging, Root Cause Analysis (RCA), Log & Trace Analysis, Performance Profiling, Incident Management, Grafana, Prometheus

Cloud & Practices Microsoft Azure & DevOps, AWS, Docker, Kubernetes, Helm, CI/CD, PostgreSQL, Redis, RabbitMQ, REST API Design, Unit & Integration Testing, Code Reviews, SAFe Agile/Scrum, Git

Professional Experience

Emerson

Pune, India

SOFTWARE DEVELOPMENT ENGINEER 1

Jun 2023 - Current

- Diagnosed critical data-fetching performance regressions through systematic log analysis and profiling; re-architected bottlenecked workflows into **gRPC** microservices with on-prem data caching and async workers, achieving **~93% latency reduction (5000ms to 350ms)** and **~60%** database read-load decrease.
- Leveraged **Grafana/Prometheus** observability to identify resource bottlenecks in production **Kubernetes** deployments; applied resource tuning and HPA configuration, lowering CPU usage per pod by **48%**, increasing throughput by **2.5x (up to 15000 requests/sec)**, and reducing cloud infra spend by **~32%**.
- Strengthened secure-design & delivery practices by authoring threat models, SDLA-compliant design docs and security checklists that ensured **zero critical security findings** across multiple releases, enabling predictable PI delivery without sprint spillovers.
- Contributed to the MVP release of cloud migration replacing a legacy on-prem tool, supporting roadmap targets of **1,000+ global sites** and a major revenue stream, by driving feature implementation and cross-team coordination.
- Led the internal rollout of **AI-assisted** development tools (**GitHub Copilot**) across the engineering team, accelerating feature delivery by reducing average code-review cycle time by **~25% (48h to 36h)** and increasing merged-PR throughput by **~30%**.
- Built an **AI-powered** industrial HMI generation platform in **Angular** & **.NET** using **Azure OpenAI GPT-4o** that automatically transforms customer inputs into ISA-101 compliant, DeltaV Live importable graphics with mandatory human-review gates for safety-critical systems.

ASSOCIATE SOFTWARE ENGINEER

Feb 2023 - Jun 2023

- Investigated and root-cause analyzed recurring production failures through log review and test gap analysis; implemented systematic fixes (unit and integration test coverage **38%→54%**, CI/CD smoke tests), achieving a **62%** reduction in monthly SEV incidents (**13 to 5**).
- Architected and delivered an end-to-end **Next.js** PDF generation service using the **Chromium** API, rendering complex inter-hyperlinked documents up to **1,000+ pages** as digitally signed, tamper-proof PDFs, eliminating manual export workflows for enterprise customers.
- Awarded Recognition for Outstanding Contribution (2024-26) 🏆

Convin

Pune, India

BACKEND ENGINEER AND ANDROID DEVELOPER

Sept 2021 - Apr 2022

- Identified pipeline throughput bottlenecks through performance profiling and query analysis, then redesigned ingestion workflows using Django REST, async workers, and PostgreSQL indexing, increasing throughput to **~1,500 calls/day** and reducing end-to-end latency by **~40%**.
- Automated language detection for **98%** of calls by integrating Amazon Transcribe with custom NLP heuristics, improving transcript quality to **~85%** and reducing manual corrections by **~60%**.
- Developed a production-ready enterprise Android application featuring secure call recording and resumable background synchronization.
- Achieved successful recording uploads within 5 minutes for **~90%** of sessions, reducing manual audio transfer requirements by **~75%**.
- Collaborated with a 13-person team on CI/CD pipelines, client onboarding and feature prioritization, delivering a centralized call-review integration for a 30-person management team. (Letter of Recommendation) 🏆

Projects

Dependency Analysis Reporting Tool 🏆

Mar 2026 - Current

- An **AI-assisted (MCP)** dependency analysis platform using **GitHub Copilot** to automate Open Source compliance validation across enterprise repositories, integrating **Black Duck** and **Azure DevOps APIs** for vulnerability scanning, and intelligent package recommendations.

Azure DevOps Code Review 🏆

Oct 2025 - Apr 2026

- An **AI-powered** Azure DevOps PR code review automation using **GitHub Copilot** to generate intelligent inline comments with multi-language support, improving review efficiency and code quality.

Education

AISSMS College of Engineering

Pune, India

BACHELOR OF TECHNOLOGY IN COMPUTER ENGINEERING

Aug 2019 - Aug 2023

- Graduated with *Honours in Data Science and Machine Learning*.

9.38 CGPA
