Summary

Backend software engineer with 4+ years of production experience building integration modules and data-exchange workflows in .NET (C#) and ASP.NET. Proven record designing fault-tolerant, auditable systems that connect enterprise platforms with external services — including async integration workers, retry-capable pipelines, and failure-state tracking in regulated industrial environments. Strong SQL expertise with a track record of improving system reliability and delivering production-stable integrations in cross-functional agile teams.

Skills

Programming Languages: C#, SQL, TypeScript, Python, C/C++ **Frameworks:** ASP.NET Core (MVC), gRPC, React, Angular, Django
Data & Integration SQL Server, PostgreSQL (CTEs, indexing, query optimization), Redis, RabbitMQ, NATS, REST API Design, Async Workflows
Cloud & DevOps Microsoft Azure & DevOps, Kubernetes, Docker, Helm, CI/CD, Grafana, Prometheus, Git
Concepts Integration Workflow Design, Fault-Tolerant Architecture, OOPS, REST API Design, SAFe Agile, Threat Modeling

Professional Experience

Emerson

Pune, India

SOFTWARE DEVELOPMENT ENGINEER 1

Jun 2023 - Current

- Led the internal rollout of **AI-assisted** development tools (**GitHub Copilot**) across the engineering team, accelerating feature delivery by reducing average code-review cycle time by **~25% (48h to 36h)** and increasing merged-PR throughput by **~30%**.
- Drove MVP release of a cloud integration platform replacing a legacy on-prem system across **1,000+ global sites**, translating complex external system requirements into stable internal application logic and coordinating delivery across cross-functional teams.
- Designed and built an **ASP.NET** integration module that orchestrates communication with **Azure OpenAI** (GPT-4o) and exports to the **DeltaV Live** import interface, transforming customer inputs into ISA-101-compliant graphics with mandatory validation gates for safety-critical industrial systems.
- Re-architected data exchange workflows into **gRPC** integration services with async workers, on-prem caching, retry logic, and failure-state tracking, cutting data-fetching latency by **~93% (5000ms to 350ms)** and reducing database read-load by **~60%**.
- Optimized Kubernetes deployments through resource tuning, Horizontal Pod Autoscaling (HPA), and Grafana/Prometheus monitoring, lowering CPU usage per pod by **48%**, increasing throughput by **2.5x (up to 15000 requests/sec)**, and reducing cloud infra spend by **~32%**.
- Established auditable integration design practices by authoring SDLA-compliant threat models, integration specifications, and security checklists, achieving **zero critical security findings** across multiple releases in a regulated industrial environment.

ASSOCIATE SOFTWARE ENGINEER

Feb 2023 - Jun 2023

- Improved system reliability by raising unit and integration test coverage from **38% to 54%** and enforcing CI/CD automated smoke tests, resulting in a **62%** reduction in monthly SEV incidents (**13 to 5**).
- Awarded Recognition for Outstanding Contribution (2024-26) 🏆

Convin

Pune, India

BACKEND ENGINEER AND ANDROID DEVELOPER

Sept 2021 - Apr 2022

- Redesigned data ingestion integration using **Django REST APIs**, asynchronous workers, and optimized **PostgreSQL** queries (CTEs, indexing, query plans), increasing throughput to **~1,500 calls/day** and reducing end-to-end latency by **~40%**.
- Automated language detection for **98%** of calls by integrating Amazon Transcribe with custom NLP heuristics, improving transcript quality to **~85%** and reducing manual corrections by **~60%**.
- Developed a production-ready enterprise Android application featuring secure call recording and resumable background synchronization.
- Achieved successful recording uploads within 5 minutes for **~90%** of sessions, reducing manual audio transfer requirements by **~75%**.
- Collaborated with a 13-person team on CI/CD pipelines, client onboarding and feature prioritization, delivering a centralized call-review integration for a 30-person management team. (Letter of Recommendation) 📄.

Projects

Dependency Analysis Reporting Tool 📄

Mar 2026 - Current

- An integration platform connecting **Black Duck's** vulnerability scanning API, **Azure DevOps** pipelines, and **GitHub Copilot (MCP)** to automate Open Source compliance validation across enterprise repositories - demonstrating multi-vendor API integration with reusable orchestration logic.

Azure DevOps Code Review 📄

Oct 2025 - Current

- An integration module connecting **Azure DevOps** PR APIs with **GitHub Copilot** to automate intelligent code review comments with multi-language support, improving review throughput and enforcing clean coding standards across the engineering team.

Education

AISSMS College of Engineering

Pune, India

BACHELOR OF TECHNOLOGY IN COMPUTER ENGINEERING

Aug 2019 - Aug 2023

- Graduated with *Honours in Data Science and Machine Learning*.

9.38 CGPA
