"I believe I can and I'm halfway there."

Summary

Full-Stack .NET and Angular developer with 4+ years of professional experience designing, developing, and maintaining enterprise web applications using C#, ASP.NET Core, and Angular. Proficient in building scalable RESTful APIs, TypeScript-driven front-end components, and database-backed services, with a consistent track record of collaborating across cross-functional Agile teams to deliver reliable, user-centric solutions. Experienced with Azure, Docker, CI/CD pipelines, and microservices architecture.

Skills

Development Languages: C#, TypeScript, Golang, Python, SQL, C/C++, Kotlin | **Frameworks:** ASP.NET Core, React, Angular (RxJS), Next.js, gRPC, WPF, Django | **AI Tools & Platforms:** Azure OpenAI, Microsoft AI Foundry, GitHub Copilot

Cloud & DevOps Microsoft Azure & DevOps, AWS, Google Cloud, Kubernetes, Docker, Helm, CI/CD, PostgreSQL, Redis, RabbitMQ, NATS
System & Concepts OOP, REST API Design, Unit & Integration Testing, Code Reviews, Database Design & Optimization, SAFe Agile/Scrum, Git

Professional Experience

Emerson

Pune, India

SOFTWARE DEVELOPMENT ENGINEER 1

Jun 2023 - Current

- Led the internal rollout of **AI-assisted** development tools (**GitHub Copilot**) across the engineering team, accelerating feature delivery by reducing average code-review cycle time by **~25% (48h to 36h)** and increasing merged-PR throughput by **~30%**.
- Contributed to the MVP release of cloud migration replacing a legacy on-prem tool, supporting roadmap targets of **1,000+ global sites** and a major revenue stream, by driving feature implementation and cross-team coordination.
- Built an **AI-powered** industrial HMI generation platform in **Angular & .NET** using **Azure OpenAI GPT-4o** that automatically transforms customer inputs into ISA-101 compliant, DeltaV Live importable graphics with mandatory human-review gates for safety-critical systems.
- Re-architected data workflows into **gRPC** microservices with on-prem data caching and async workers, cutting data fetching latency by **~93% (5000ms to 350ms)** and reducing database read-load by **~60%**, improving end user reliability.
- Optimized Kubernetes deployments through resource tuning, Horizontal Pod Autoscaling (HPA), and Grafana/Prometheus monitoring, lowering CPU usage per pod by **48%**, increasing throughput by **2.5x (up to 15000 requests/sec)**, and reducing cloud infra spend by **~32%**.
- Strengthened secure-design & delivery practices by authoring threat models, SDLA-compliant design docs and security checklists that ensured **zero critical security findings** across multiple releases, enabling predictable PI delivery without sprint spillovers.

ASSOCIATE SOFTWARE ENGINEER

Feb 2023 - Jun 2023

- Architected and delivered an end-to-end **Next.js** PDF generation service using the **Chromium** API, rendering complex inter-hyperlinked documents up to **1,000+ pages** as digitally signed, tamper-proof PDFs, eliminating manual export workflows for enterprise customers.
- Improved system reliability by raising unit and integration test coverage from **38% to 54%** and enforcing CI/CD automated smoke tests, resulting in a **62%** reduction in monthly SEV incidents (**13 to 5**).
- Awarded Recognition for Outstanding Contribution (2024-26) 🏆

Convin

Pune, India

BACKEND ENGINEER AND ANDROID DEVELOPER

Sept 2021 - Apr 2022

- Redesigned ingestion pipelines using Django REST, asynchronous workers, and PostgreSQL indexing, increasing throughput to **~1,500** calls/day and reducing end-to-end latency by **~40%**.
- Automated language detection for **98%** of calls by integrating Amazon Transcribe with custom NLP heuristics, improving transcript quality to **~85%** and reducing manual corrections by **~60%**.
- Developed a production-ready enterprise Android application featuring secure call recording and resumable background synchronization.
- Achieved successful recording uploads within 5 minutes for **~90%** of sessions, reducing manual audio transfer requirements by **~75%**.
- Collaborated with a 13-person team on CI/CD pipelines, client onboarding and feature prioritization, delivering a centralized call-review integration for a 30-person management team. (Letter of Recommendation) 📄

Organizational Experience

AISSMS COE

Pune, India

CORE TEAM MEMBER MICROSOFT STUDENT CLUB

July 2021 - Sept 2022

- Built a university Timetable Scheduler 📅 model with a colleague, which uses a genetic algorithm and is portable for various scheduling scenarios, such as school timetables or employee timesheets.
- Designed the scheduler to be flexible for any case, with lower time complexity compared to existing models that were only useful in specific scenarios.
- Developed a Certificate App 📄 for easier certificate generation and distribution, which helped the college's Sports Department manage certificates for competitions and events.
- **Technical Skills:** Python with genetic algorithms, Django, HTML5, CSS3, JavaScript, CI & CD, Git.
- **Soft Skills:** Teamwork, time management, communication, logical thinking.

AISSMS COE

Pune, India

- Led the Competitive Programming Team and organized multiple virtual and in-person events for freshmen and juniors.
- Conducted events focused on Git, Data Structures, Algorithms, and Competitive Programming, helping participants understand fundamental concepts and improve their coding skills.
- Contributed as a member of the Web Development Team to the DSC AISSMSCOE [official website](#).
- **Technical Skills:** Python (Algorithms, Data Structures), Tailwind CSS, Firebase, Git.
- **Soft Skills:** Leadership, Time Management, Communication, Logical Thinking.

Projects

Dependency Analysis Reporting Tool [🔗](#)

Pune, India

EMERSON

Mar 2026 - Current

- Built an **AI-assisted (MCP)** dependency analysis platform using **GitHub Copilot** to automate open-source compliance checks across enterprise repositories and standardize policy validation workflows.
- Integrated **Black Duck** and **Azure DevOps APIs** to continuously ingest repository metadata, detect vulnerable/outdated libraries, and generate actionable remediation suggestions for engineering teams.
- Implemented rule-based package recommendation and reporting pipelines with exportable dashboards, enabling faster audit readiness and more consistent SDLA-aligned dependency governance.

Azure DevOps Code Review [🔗](#)

Pune, India

EMERSON

Oct 2025 - Apr 2026

- Developed an **AI-powered** Azure DevOps PR review assistant that analyzes pull-request diffs and generates contextual inline comments using **GitHub Copilot**.
- Designed support for multi-language repositories with reusable review prompts and policy checks, helping teams enforce code quality, security, and maintainability standards consistently.
- Automated review summarization and feedback publishing in CI workflows, reducing manual reviewer effort and shortening developer feedback loops in day-to-day delivery.

Display Forge [🔗](#)

Pune, India

EMERSON

Feb 2024 - June 2025

- Engineered an **AI-powered** industrial HMI generation platform using **Azure OpenAI GPT-4o** to convert customer input into structured, ISA-101 aligned screen definitions for DeltaV Live workflows.
- Built transformation pipelines that produce DeltaV Live-importable graphics artifacts, with validation checks for naming standards, object consistency, and template conformance.
- Introduced mandatory human-in-the-loop approval gates and traceable review checkpoints for safety-critical deployments, balancing automation speed with operational reliability and control.

DarkSpider [🔗](#)

Pune, India

AISSMS COE

Aug 2022 - Feb 2023

- White paper: Anatomy of the Dark Web's Network Structure to Detect Illicit websites [🔗](#)
- Engineered a multithreaded crawler to map dark-net site structures as a directed graph, utilizing PageRank algorithms to identify high-value nodes.
- Developed incremental crawling with content-based ranking and change detection mechanisms with URL expiration handling to maintain dataset freshness and eliminate redundant fetches.
- Implemented rate limiting and sandboxed execution environments to ensure ethical research practices and minimize operational impact during data collection.

Education

AISSMS College of Engineering

Pune, India

BACHELOR OF TECHNOLOGY IN COMPUTER ENGINEERING

Aug 2019 - Aug 2023

- Graduated with *Honours* in *Data Science and Machine Learning*. 9.38 CGPA
- **Relevant Coursework:** AI, ML, Deep Learning, NLP, Blockchain, Security, DBMS, Data Structures, Computer Graphics, Discrete Math, Big Data Analytics, Data Visualization, Statistics

Achievements

2025	Certificate	Microsoft Certified: Azure Fundamentals (AZ-900) 🔗	Pune, India
2024-26	Certificate	Recognition for Outstanding Contribution 🔗	Pune, India
2024-25	Winner	Emerson: Capture The Flag (Hack The Box) 🔗	Global
2022	White paper	Anatomy of the Dark Web's Network Structure to Detect Illicit websites 🔗	India
2020	Winner	Internal Hackathon for Smart India Hackathon (SIH)	India
2015	Winner	District level Karate Competition	Pune, India

Interests

Linux Since 2020, I have loved using Linux. Linux ricing [🔗](#) is my hobby.

Karate I started karate at age 15 and have participated in several state and national-level competitions.

Music I enjoy almost all types of music, but my favorite genres are aesthetic EDM and electro.
